

always been

It's [^]what's inside that counts

Reckon Accounts is the new name for the product thousands of Australian businesses have grown to know and love for almost 20 years.

Reckon has been localising Intuit's QuickBooks products for Australian users for more than 20 years. Over the last 12 months we've proudly brought the Australianised version of the product range under the Reckon name. The newly named Reckon Accounts business range of products still includes the well-known Accounting, Plus, Pro, Premier and Enterprise editions, as well as Reckon Accounts Hosted.

Your business can continue to rely on Reckon Accounts

Only the name has changed.

The Reckon Accounts business range of products has the same look, feel and sophistication that accountants, bookkeepers and business owners in Australia and New Zealand have come to rely on. Reckon will continue supporting these users as we always have, and developing the programs to meet modern business needs.

In Australia

Reckon no longer uses the names QuickBooks or Quicken in Australia. All products owned and supported by Reckon use our company branding. For Reckon Accounts business range of products visit www.reckon.com

Taking your business to the cloud

In addition to the Reckon Accounts desktop range of products, Reckon Accounts Hosted provides users with the same product in an online environment. Plus, we will soon release a new pure cloud accounting program, Reckon One. Reckon One has been specifically built for web and mobile. At first Reckon One will be ideal for micro-businesses. Over time Reckon One will grow to include similar sophisticated features found in the Reckon Accounts business range.
